Customizing and Creating Your Own Shortcuts

While AutoCAD comes with a robust set of default shortcuts, customizing your own can further enhance your workflow.

How to Customize Command Shortcuts

Access the CUI Editor: Type `CUI` into the command line and press Enter.

Navigate to Keyboard Shortcuts: In the CUI dialog, locate the "Keyboard Shortcuts" section.

Create New Shortcut: Click on "New" and assign a key or key combination to a command.

Assign Commands: Link your custom shortcut to the desired command or macro.

Save and Test: Confirm changes, save your workspace, and test your new shortcuts.

Tips for Effective Shortcut Customization

Use intuitive and memorable key combinations.

Avoid conflicts with existing shortcuts.

Group related commands for logical access.

Regularly review and update shortcuts as your workflow evolves.

Advanced Shortcuts and Automation Tips

Beyond basic commands, mastering advanced shortcuts and automation can further elevate your AutoCAD skills.

Alias Commands

AutoCAD allows you to define alias commands, which are custom shortcuts that can be as simple as abbreviations.

Example: Define `PL` as a shortcut for Polyline.

To set aliases, modify the `acad.pgp` file located in your AutoCAD support folder.

Open `acad.pgp` with a text editor.

Add a line like: `PL, -PLINE`

Using Scripts and Macros

Automate complex sequences by creating scripts or macros that execute multiple commands with a single shortcut.

Write scripts in AutoCAD Script files (`.scr`).

Assign these scripts to custom keyboard shortcuts.

Use the `RUN` command to execute scripts quickly.

Leveraging Tool Palettes and Quick Access Toolbar

Customize your Quick Access Toolbar with frequently used

commands for one-click access. Assign keyboard shortcuts to commands added here for rapid execution.

**Practical Workflow: Combining Shortcuts for Efficiency** Let's look at a typical workflow where command shortcuts significantly reduce the time spent on drafting tasks.

**Example: Drawing and Modifying a Room Layout** Start with the Line tool (`L`) to sketch the perimeter. Use Copy (`CO`) to duplicate walls or features. Apply Trim (`TR`) to clean up intersections. Draw doors and windows with Rectangle (`REC`) and Circle (`C`). Use Hatch (`H`) to fill areas to distinguish different zones. View the drawing with Zoom (`Z`) and Pan (`PAN`). Finalize with Match Properties (`M2P`) to ensure consistency. This sequence demonstrates how memorizing and combining shortcuts can make complex tasks more manageable.
